

VILLAGE BARN

The ultimate Eco-Friendly Luxury Stay

Nestled in the heart of the Cotswolds and offering astonishing views of the surrounding landscape, Village Barn is a spacious and welcoming retreat to the country.

The Barn was created out of a love for art, a discerning eye for beauty and a desire for an organic, natural lifestyle.

VILLAGE BARN

Bledington | Sleeps: 5+1 | Bedrooms: 3

Village Barn is a luxurious, ecologically sustainable property for up to six guests. Our 300 year old former cattle barn has been thoughtfully renovated: we recycled and re-purposed the majority of the original materials and retained exposed stone and oak beams to create a spacious property of modern rural elegance.

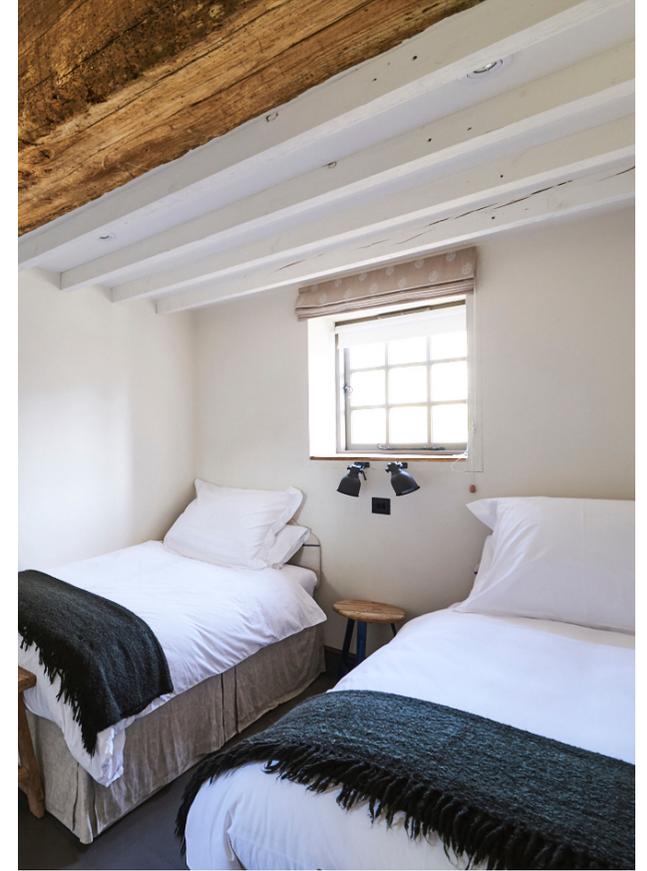

A wonderful boutique escape for family or friends.

Settled beside the idyllic village green in Bledington, Village Barn is situated in the grounds of the owner's lovely farmhouse. It enjoys a peaceful and private rural setting and is well positioned next to an excellent village pub. The perfect mix for a relaxing country stay.

The village is famed for its charming green, which offers swings, ducks, and ice-cream from a shepherd's hut as well as an award-winning country pub

"This is a first class experience. If you are looking for a beautiful location, sparkling clean residence, and a warm, comfortable serene stay this is the place for you. The village is perfect! A green space for children to play, a delicious pub, and an ice cream wagon. I can't say enough good things about our host. She accommodated without hesitation a last minute hiccup we had with a member of our party. Would recommend without hesitation to anyone... a gem"

Erica, May 2019

"This is hands down the best AirBnB we have ever had the privilege to stay in. What an exquisite home, from the restoration details to the amenities, nothing was overlooked in reviving this barn. Its super convenient spot next door to the pub was a plus as well. I totally look forward to being able to stay in this place again on my next visit to the lovely Cotswolds. "

Jill, October 2019

Chipping Norton | 6 miles

THINGS TO DO

Walk the Cotswold Way, have a hire bicycle delivered to the door, or immerse yourself in the grandeur of nearby Blenheim Palace. Sip local ales at Hook Norton Brewery, shop 'til you drop at Bicester Village and get up close and personal with the lions at the Cotswold Wildlife Park.

If this all gets too tiring the Haybarn Spa at Daylesford Farmshop is fabulously spoiling!

Village Barn's superbly equipped kitchen will be hard to leave but we suggest escaping to sample some of the UK's very best restaurants and pubs. The King's Head, The Wild Rabbit, The Old Spot at Daylesford, the Kingham Plough, The Chequers are all within an appetite inducing walk, or a 10 minute drive. For Soho House members, a day spent at nearby Soho Farmhouse is well worth a trip.

YOUR ULTIMATE ECO-FRIENDLY STAY

We recycled all the building materials the old barn had to offer: the original cowshed window is now the bathroom mirror; the hay loft ladder - the towel rail; the old engineering bricks work fabulously in tandem with the underfloor heating powered by wood pellet boiler.

We created an authentic organic environment and take care to produce minimal waste. We chose a refillable range of toiletry amenities, eliminating the need for little plastic bottles. We support nature through our choice of fuel (wood pellet), paint and cleaning products. Our water has 4 stages of filtration as well as being structured water for optimal hydration. The fully organic garden at Village Farm offers a herbicide, pesticide, fungicide free environment. In short we have aimed for all the luxuries whilst remaining true to our environmental principles.

"It was my intention in Village Barn to allow the simple sophistication of light and space.

We aimed for all the luxuries whilst leaving the lightest possible ecological footprint."

Catherine Chichester, owner

The house is immaculate, best location ever! 10 stars.
